Hard Water Problems.

Unsightly rings around the bathtub and soap scum tiles are a result of soap reacting with hard water. This messy substance adds hours of extra housework and requires harsh, expensive, toxic cleaners.

Scale and lime build-up inside copper plumbing due to hard water contaminates.

Soaps and detergents must overcome water hardness. Using too much is wasteful and expensive, too little results in dingy, unclean washes. Hard water can squander money spent on cleaning products.

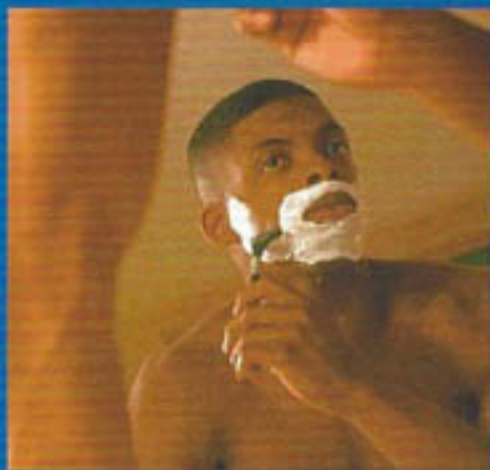

Hard water resists clean rinses of clothes. Build-up of detergent attracts stains and weakens fabrics, causing clothing to wear out faster.

Hard water soap curd clogs pores, dries skin, and leaves dull deposits on your hair, rendering it flat and lifeless.

Hard water contributes to razor drag, irritating and drying your skin.

Hard water reduces the life of water heaters, dishwashers, washing machines and other household appliances.

Guardian™ Soft Water Advantages!

- Smoother, softer, less irritated skin after shaving will make you wonder how you ever got along without a **GUARDIAN** water conditioner.

- Soap lathers up with ease, and washes away completely, leaving hands clean and soft.

*Save money
by reducing
your soap
and detergent*

- Clothes last longer, rinse cleaner, stay brighter and don't stain as easily.

- Dishes rinse cleaner with less detergent.

- Water slides off glasses leaving them spotless.

- Feel cleaner and fresher after a gentle bath.

- No more bathtub ring or soap scum on tiles, sinks, and shower stalls.

*Increase the
life of your
water heater
and reduce
water heating
expense*

- Shiny, lustrous hair is healthy and full of life.

- Feel younger with cleaner, softer skin.

- Harsh, toxic chemicals used for cleaning hard water related problems can be virtually eliminated, making your home safer and healthier.

*Eliminate
build-up of
lime and scale
in household
plumbing!*

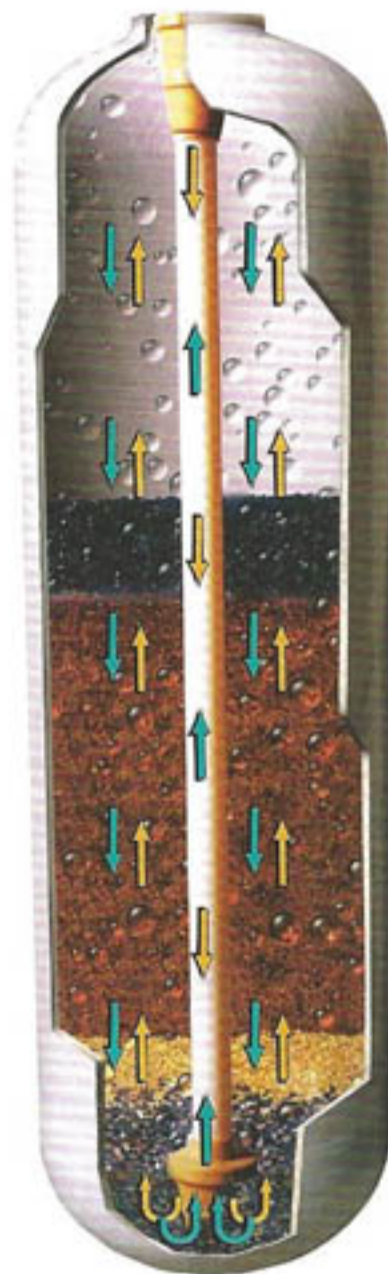

Inside the Guardian™ Water Conditioner

No matter where you live or what your water quality needs are, your authorized Guardian water treatment dealer can help improve your water. Guardian water treatment systems are designed to meet the most challenging water problems the most efficient way possible, and by using only the most reliable equipment available in the industry. That's a Guardian promise.

Your Guardian representative will test your water and analyze the results right in your home. Depending on the test results, he/she may recommend options for improving your water's quality. Through the proper blend of water filtration medias, water challenges such as high iron or manganese levels, pH imbalance, turbidity, hydrogen sulfide (rotten egg smell) and tannins (yellow or brownish coloring) can be eliminated. The most extreme levels of hardness can be softened.

Chlorine and other taste affecting elements can be removed. Your entire family will enjoy an immediate difference, and if your plumbing could talk, you would hear cheers coming from behind your walls.

Ask your Guardian representative for a FREE water test today.

Carbon Cap - Granular Activated Carbon removes chlorine, unpleasant tastes and odor.

High Capacity Cross-Linked Cation Resin - Higher capacity to remove iron and hardness minerals.

KDF - Inhibits bacteria growth and removes heavy metals.

Garnet - Provides sediment filtration and promotes even distribution.
